

Date _____

Dear Federal, State and/or Local Officials,

This letter serves to notify County/City Mayors, County Commissioners, District Attorneys, State Attorney Generals, Sheriffs, US and State Representatives, US and State Senators and/or Governor Bill Lee.

We the undersigned residents of Tennessee, a group of concerned individuals respectfully request that you review the enclosed documentation at your earliest convenience.

- The first 4 pages (Background and Table of Contents) of the 205 page Fauci/COVID-19 Dossier prepared by Dr. David E. Martin which includes a timeline of the funding and patents for SARS Coronavirus which started in 2002. A link to the entire Dossier is noted below.
- The Criminal Conspiracy of Coronavirus prepared by Dr. David E. Martin.

We implore you to do everything in your power to move forward with impaneling a grand jury into the criminal conspiracy behind this planned pandemic.

It is in Tennessee's best interest from a moral, legal and monetary perspective to look into this matter. Dr. Martin has already forwarded these documents to every single State Attorney in the United States.

The data clearly shows that the entirety of the pandemic is man-made. All the parts of the so-called SARS-Co-V-2 virus are patented for profit by stakeholders taking advantage globally to prosper with the virus and the supposed solution to it which is the never ending "vaccines" and "boosters".

We believe the parties that created this pandemic should and must be held responsible. It appears they could be in violation of federal criminal and civil statutes including the U.S. Federal Torts Claims Act. We believe this should be investigated and any participants in this conspiracy should be dealt with according to the law.

This man-made pandemic has caused great peril to the people of Tennessee and the entire Nation. This highly profitable drug treatment program has been launched across Tennessee and in every county and something needs to be done about it!

We know there is an option for redress of grievances against parties that have refused to uphold the public interest and protect the public health. We believe this to be the best option to stop this man-made pandemic.

We insist that the projects and programs that are bringing harm, injury, legal liability and financial losses to the State of Tennessee and its taxpayers be brought to a quick and abrupt end.

Respectfully yours,

Concerned Citizens of TN
